

# Chhavi

+91 8101081616 | thechhavi13@gmail.com | linkedin | github

Computer Science undergraduate with a strong foundation in software engineering, full-stack development, and data structures algorithms. Built secure, production-style applications using React, Node.js, Express.js, and SQL/NoSQL databases, with hands-on exposure to GenAI technologies including LangChain and Retrieval-Augmented Generation (RAG). Currently expanding expertise in Machine Learning and AI-driven software systems.

## EDUCATION

### Maharaja Surajmal Institute of Technology

Bachelor of Technology in Computer Science Engineering; CGPA: 8.84/10.0

New Delhi, IN

Graduating in 2028

## TECHNICAL SKILLS

**Languages:** Java, Python, C++, C, JavaScript, TypeScript, SQL, HTML/CSS

**Frameworks:** React.js, Node.js, Express.js, FastAPI

**Databases:** MySQL, PostgreSQL, MongoDB

**AI / GenAI:** LangChain, CrewAI, Retrieval-Augmented Generation (RAG), Groq LLM

**Tools and Concepts:** Git, GitHub, Postman, Vercel, Data Structures Algorithms(DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Computer Networks, Statistics, Linear Algebra

## EXPERIENCE

### Web Developer Intern

July 2026 – Present

InAmigos Foundation

Remote

- Developed responsive web application features using React.js, Node.js, Express.js, HTML, CSS, and JavaScript in a collaborative development environment.
- Built and integrated RESTful APIs to enable seamless communication between frontend components and backend services.
- Collaborated with mentors and fellow developers using Git and GitHub, contributing to feature development, debugging, testing, and code integration.

## PROJECTS

### NeuroNote | React.js, Node.js, Express.js, MongoDB, JWT, JavaScript

GitHub

- Engineered a full-stack MERN application enabling secure management of notes, books, and PDF resources through a centralized dashboard.
- Designed and implemented RESTful APIs supporting CRUD operations and seamless communication between the React frontend and Express backend.
- Implemented JWT-based authentication and authorization to secure user accounts and protect application resources.
- Built a responsive React.js interface using reusable components and integrated MongoDB for reliable data persistence and efficient content management.

### SkyWeave | Java, HTML5, CSS3, JavaScript, MySQL, JDBC, BCrypt, Git

GitHub

- Developed a web-based airline route planning platform using object-oriented programming principles to manage airports, flights, and administrator operations.
- Designed a modular Java backend with JDBC-MySQL integration, implementing efficient business logic and database management.
- Built a secure administrator portal with BCrypt password hashing and CRUD functionality for managing airports and flight schedules.
- Designed a responsive user interface featuring an admin dashboard, interactive navigation, and Light/Dark mode while following modular software architecture for maintainability.

## CERTIFICATIONS & ACHIEVEMENTS

Google Developer Program | Google

AI Skills Passport | EY and Microsoft

AI and Generative AI | Microsoft Learn

AI Foundations | Celonis

GirlScript Summer of Code 2026 | Open Source Contributor
